CAREER OBJECTIVE

Full-Stack Developer with a solid foundation in AI-powered applications and modern software architecture. Successfully designed and deployed web applications using React, Node.js, Python, MongoDB, and CI/CD pipelines on Google Cloud. Eager to contribute technical skills in Full-Stack development and DevOps to drive innovative solutions.

EDUCATION

Master of Computer Applications (MCA), Amity University Online 2024-Present
Noida, Uttar Pradesh, India

Bachelor of Science, Lucknow Christian College 2021-2024
Lucknow, Uttar Pradesh, India

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python
- **Frontend:** React, HTML5, CSS
- **Backend:** Node.js, Express.js, FastAPI, REST APIs
- **Databases:** PostgreSQL, MongoDB, Redis
- **AI/ML Frameworks:** LangChain, LangGraph, LangSmith (Tracing, Performance monitoring)
- **Tools & DevOps:** Docker, Git, GitHub Actions, Celery (Task Queue System)
- **Core Competencies:** Data Structures & Algorithms, Problem-Solving

PROJECTS

AI Interview | [Link Demo](#) | [Source Code](#) May 2025 - Aug 2025

- Created a complete AI interview platform using React, Node.js, MongoDB, Redis, JWT authentication, guided and hard modes, and WebSocket-based real-time AI sessions.
- Implemented "//explain" commands in guided mode for instant explanation and a detailed feedback system with scoring and analysis for each question.
- Reduced AI response time to 3-6 seconds by implementing Redis caching and integrating Google Cloud Text-to-Speech API
- Deployed an application with Docker containerization, GitHub Actions CI/CD pipeline, and Google Cloud Platform.

AI Manim Video Generator | [Link Demo](#) | [Source Code](#) Jul 2025 - Aug 2025

- Created a full-stack video generation platform with React, FastAPI, and MongoDB, along with LangChain, LangGraph, and LangSmith for smarter Manim code generation and feasibility checks.
- Designed a multi-agent workflow for query analysis, iterative refinement, and self-healing code generation that automatically debugs failed renders.
- Built a scalable pipeline with Celery workers and Redis for complete video creation. This setup is hosted on Google Cloud Platform with Docker and CI/CD using GitHub Actions.
